Straight Truck	30'	8.5'	37 / 396	2 (1@20')	65	73	78	60	68	72

*These numbers should be used as a guideline only. The number of animals on a trailer should be calculated using the specific floor space available in each compartment of the trailer and the average weight of the hogs in the load to comply with CFIA regulations and the Code of practice for the care and handling of livestock: transportation 2001.
